

**3D TENDER**®

HIGH PERFORMANCE RESEARCH & DEVELOPMENT

**CATALOG 2026**

**YOUR REFERENCE FOR RIBS AND TENDERS**

# 3D TENDER

Semi-rigid, polyester hulls, aluminum hulls, removable floors, ultra-light tenders with high-pressure inflatable bottoms - over 100,000 boats delivered worldwide since the 3D TENDER brand was launched in 2007. Performance, comfort, durability and competitive prices have always been the core values of 3D TENDER.

3D TENDER's robust approach to design and manufacturing gives both pleasure and commercial boat owners the confidence to go further and face the conditions that many others avoid.

The 3D TENDER range offers you an incomparable choice of models with exceptional quality/price ratios on the market!

## ENVIRONMENT

We pay great attention to environmental issues in the production of the 3D Tender boats. We make sure to use non-polluting, energy-efficient processes that respect the health of employees and users. The choice of raw materials is crucial, since it enables us to build boats that are not only highly resistant, but also close to nature.

## LIGHT WEIGHT

Aluminum hulls provide boats with strength and an unbeatable weight advantage. These boats can therefore be powered by small engines, which are less expensive, more fuel-efficient and reduce CO2 emissions.

## ALUMINIUM

Aluminium is one of the few materials that can be recycled indefinitely without losing its qualities and properties.

## POWDER COATING

3D Tender has chosen to use powder coatings. These powders are electrically charged and are sprayed onto the prepared surfaces before being dried in an oven. The finish is impeccable, and the painted surfaces are smooth and glossy.

Powder coatings offer considerable advantages over conventional liquid paints:

- No volatile organic compounds
- No solvents (no risk of fire, pollution, etc.)
- No pollution, as excess powder is easily collected by suction

Curing times and temperatures have been significantly improved to reduce process energy consumption.

# PATROL 860

## RIB'S FIBERGLASS HULL

The biggest boat of the range, the **PATROL 860** is an «on demand» RIB for all sailing programs.

The high-performance hull of the boat gives it an exceptional passage at sea. The Patrol's deep-V composite hull, wide chines and large diameter tubes, provide excellent maneuverability and stability on the water, resulting in unparalleled onboard safety. The **PATROL 860** is a fully modular boat, you can choose to position all the optional equipment (Console, Bolster Seat, Bench...) wherever you want. This modularity makes it possible to meet the needs of both professionals (firefighters, coastguards) and individuals (Pleaseure and fishing).

The boat is available in PVC Melher or in HYPALON ORCA® fabric from the Belgian company, Pennel and Flipo.

The **PATROL 860** is available in a 12-passenger NUC-certified commercial version, and is available in division 222.

# DREAM 850

## RIB'S FIBERGLASS HULL

The DREAM 850 has been specially designed to combine performance and reactive driving.

Equipped with modern layout that can be adapted according to your desires. It reinterprets and reinvents the spaces on board to make it an outstanding pleasure boat.

The deep V hull is made of reinforced fiberglass, the deck is self-draining and the rear access platform to the sea with a bathing ladder allows an easy descent and ascent. Each model in the Dream range comes with a large sundeck with several storage lockers and a retractable picnic table.

The tubes are available in HYPALON ORCA® fabric from the company Pennel et Flipo, they contain 6 watertight compartments, 6 inflation valves and are protected by two double anti-drag strips.

## SPECIFICATIONS

T-top equipped with LED bar and solar panels  
Extendable bimini with carbon supports  
Rear saloon with picnic table convertible into sundeck  
Rear locker  
4 front storage lockers  
Complete upholstery  
Electric windlass

Rear platform with telescopic swim ladder and handrail  
Automatic bilge pump  
Circuit breaker, battery tray and switch panel  
Compass  
Navigation lights  
30L electric cooler with 12V socket  
Retractable cleats

# DREAM 7

## RIB'S FIBERGLASS HULL

The Dream 7 is designed to offer a good balance between performance and comfort. Its deep-V hull, made of reinforced fiberglass, ensures stability and safety even in rough seas.

At the stern, the platforms with a swim ladder make access to the water easy and can be removed, allowing the boat to be certified at 6.95 m.

The deck layout is modular: a large sunbed sits atop several storage compartments, and a retractable table makes it easy to enjoy time on board.

The tubes are available in ORCA® Hypalon by Pennel & Flipo, made up of six watertight compartments and protected by two double rubbing strakes for increased reliability and durability.

## SPECIFICATIONS

# COACH BOAT IQ6/IQ5

## RIB'S FIBERGLASS HULL

The foil has revolutionized the world of sailing, and today we are literally flying over the water at impressive speeds!

This is why 3DTender has created the IQ6 and IQ5, in collaboration with coaches from around the world.

Equipped with a "Wave Piercer" hull that offers exceptional seakeeping, the IQ6 and IQ5 are self-draining boats designed to meet the needs of coaches and enthusiasts of modern sailing.

The IQ6, like the IQ5, meets all the requirements of foil coaches and provides unparalleled comfort thanks to its shock-absorbing deck.

Available in PVC Mehler® or HYPALON ORCA®, they are sold in standard versions or as a Pack with all necessary equipment and engine, ready to sail!

# ODYSSEY 635

## RIB'S ALUMINIUM HULL

The **Odyssey 635** is the brand-new boat in the 3D Tender leisure RIB range. With this vessel, experience the luxury of a large model in just six meters of length—a fully equipped boat for your outings at sea with friends or family.

Designed by our architect Samy BOUBEZARI, the exceptional layout offers you two sunbathing areas: one at the front and a queen-size bed at the rear, convertible into a relaxing space around the foldable table.

The **Odyssey 635** is a unique **aluminum** RIB with a hull that ensures smooth and safe navigation, even on the roughest seas.

# XPRO RIB ALU

## RIB'S ALUMINIUM HULL

The XPRO RIB ALU are all made of thermo-welded or hot glued PVC and are also available in Hypalon fabric. The range of boat is ideal for those who need a strong, lightweight and maneuverable boat.

This range offers a solution for almost every need, from support to sailing clubs to fishing and water sports. Each model has an aluminum hull, double floor and a forward locker for storage of the nurse.

These boats allow a good cruising speed with small engines and thus offer an important and not negligible fuel economy.

The XPRO RIB ALU 420 has a reinforced transom, to accommodate more powerful engines (up to 60 HP). The Jockey L console (C07) is adapted to this boat range.

# POLAR 580

## FOLDABLE BOAT INFLATABLE FLOOR

The **POLAR** is a foldable boat, easy to transport and that can be stored in two separate bags. The **POLAR** is a foldable boat, easy to transport and designed to be stored in two separate bags: one for the hull and the other for the floor. The boat resistance makes it the best ally for police fleets, rescuers and professional users around the world.

The **POLAR** is designed to carry heavy loads, while maintaining high speed. When sailing, the hull rests solely on the two inflatable keels, the wet surface is reduced and the lift increased for exceptional sailing comfort and extreme sensations.

The **POLAR** is a stable boat equipped with a reinforced transom, numerous rings, handles and safe-lines making it a very secure boat and suitable for exploration, especially in polar climates.

# SURF RESCUE 400

## FOLDABLE BOAT INFLATABLE FLOOR

The **SURF RESCUE 400** is a lightweight, inflatable, foldable boat.

It can be deployed very quickly and thus offers a fast response to an emergency situation for rescue professionals.

The design of the **SURF RESCUE 400** and its inflatable keel make it extremely maneuverable and stable, it can easily deal with rough seas, and has a large load capacity for a boat of its size.

Its practicality is also proven by its large handles strategically positioned to facilitate transport, the front cover that offers additional storage capacity sheltered from the water, as well as its safe-line that runs along the tubes to secure the passengers on board.

The tubes are available in PVC Valmex® from the German company Melher or in HYPALON ORCA® fabric from the company Pennel et Flipo.

# T33

## ALUMINIUM TENDER ALUMINIUM HULL

HIGH PERFORMANCE RESEARCH & DEVELOPMENT

The T33 is the new aluminum tender that redefines comfort and ergonomics standards for its category. Made from high-quality marine-grade aluminum, both eco-friendly and recyclable, it combines robustness and lightness for optimal navigation. Its hull is painted white using an environmentally friendly process, the "powder coating," ensuring a smooth, durable finish and increased resistance to marine corrosion.

Equipped with four seats, the T33 is designed to provide a comfortable navigation experience. The helm console, positioned at the very front, frees up generous space to maximize onboard storage. The angle of the transom and the bow have been carefully studied to guarantee excellent seaworthiness, even for a tender of this size. For added convenience, it features a boarding step that makes getting on board easier. The T33 thus combines innovation, comfort, and environmental respect to meet the demands of sea enthusiasts.

## CARACTÉRISTIQUES

**T33**

**330**

Full lenght	3.35 m
Interior lenght	2.40 m
Width	1.87 m
Interior width	1.10 m
Depth	0.80 m
Dead rise transom	12 °
Tube diameter	44 cm
Air chambers	4
Weight	160 kg
Tube inflation pressure	0.25 bar
Passengers	6
Maximum load weight	700 kg
Maximum power	30 HP
Engine shaft	Simple L
Design category	C

**Hypalon**

**7 590€ Inc. tax**

## EQUIPEMENT

### STANDARD

- Console and pilot seat
- Complete upholstery
- Double aluminum floor with EVA coating
- Integrated lifting rings in the hull
- Bench with foldable backrest
- Side platform for easy access
- Removable side cushion for seating and safe stepping on the tender
- Rear mast
- 25L fuel tank
- Storage compartments
- Rubbing strake
- Bow protection strip
- Inflator

### OPTION

- Ladder
- Boat cover

**ULTIMATE**  
360/340/320/300/280/260/240

## ALUMINIUM TENDER ALUMINIUM HULL

The **ULTIMATE** are light and robust aluminum semi-rigid tenders, each model is equipped with an aluminum double floor and the flat deck is covered with an non skid EVA pads, for maximum comfort.

The double floor of the dinghy allows water to drain water from the bottom of the hull, the flat deck is covered with a non-slip EVA coating. The boats are in grey aluminum hull, guaranteeing the longevity of your boat.

The high strength marine grade aluminum is powder coated and heated to a high temperature to ensure a smooth, durable and environmentally friendly finish. The bow protection and ultra-wide tube protection give you the peace of mind you need when docking. The pronounced V-shape of the hull provides exceptional stability and passage through the waves. The boats are all equipped with 4 lifting rings for use on davits and a towing ring at the front of the hull.

# FEDERLIGHT

**ALUMINIUM TENDER  
ALUMINIUM HULL**

**365/335/315/285/265/245**

The **FEDERLIGHT** is the new ultra-light aluminium dinghy which is available in 6 models from 2.45 m to 3.65 m.

Our new range distinguish itself by the design of the hull and the quality of construction that allow it to combine lightness and performance. Made of high quality recyclable marine aluminium.

The hull design of each model has been studied for an exemplary marine behaviour for small boats... The dead rise at the transom and the bow varies from one model to another for a smooth sailing at sea.

The main advantage of the **FEDERLIGHT** is its weight, but it can nevertheless also carry large loads. For this new dinghy, 3DTENDER has developed a new, wider, lighter and more UV-resistant tube protection strip, that doesn't mark your boat when docking, and protects the tubes of your tender from front to back. For more comfort on board, the distribution of the elements on the tubes has been thought for a more ergonomic use...

The fabrics of our tubes are available in PVC Valmex® from Melher, or in Hypalon ORCA®.

# SAIIL TENDER

## FOLDABLE TENDER INFLATABLE FLOOR

The Sail Tender by 3D Tender is a versatile boat that can be used both as a classic tender and as a **fun sailing dinghy**.

In just **under 10 minutes**, you can transform it into a sailboat – simply install the mast, rudder, daggerboard, and sail using the quick and easy rigging kit.

Perfect for adults looking for a practical, multipurpose tender, and great fun for kids who want to experience the joy of sailing!

Compact, lightweight, and easy to handle, the Sail Tender brings versatility and adventure to every trip on the water.

# TWIN AIR

**FOLDABLE TENDER INFLATABLE FLOOR**

**290/270/250/230/200/180/160**

3D Tender has developed the **SUPERLIGHT TWIN AIR** range in order to meet the demands of boaters. Inflatable, foldable, compact, the Twin Air is the lightest tender on the market. Its light weight and small size will make your life easier on board. It can be easily stored in its backpack.

The **TWIN AIR** is designed with a high-pressure inflatable Drop Stitch honeycomb floor, providing great stability on board. The one-piece, non-removable floor is glued directly to the boat structure. Its conical tubes provide maximum buoyancy. It is equipped with 4 stainless steel lifting rings for use on davits or other.

The 3D Tender team has selected for this product, the best PVC fabric on the market made in Germany by the brand Mehler. This fabric called Valmex® has been tested under different sailing conditions and has met our brand's requirements in terms of quality and durability.

Like all folding dinghies in the 3D Tender range, the **TWIN AIR** is equipped with an adjustable aluminum bench, a pair of oars, an inflator and a carry bag.

## FOLDABLE DINGHY INFLATABLE FLOOR

The use of high quality, ultra-light materials makes the **SUPERLIGHT TWIN ROUND AIR** the lightest dinghy on the market. This dinghy is inflatable, foldable and easy to store in its carrying backpack.

The removable motor chair makes it easy to fold the dinghy, and the footprint is minimal.

The **TWIN ROUND AIR** is designed with a high-pressure Drop Stitch honeycomb inflatable floor that provides great stability on board. The one-piece floor, which cannot be disassembled, is glued directly to the boat's structure.

The 3D Tender team has selected for this product the best PVC fabric on the market made in Germany by the brand Mehler. This fabric, called Valmex®, has been tested under different sailing conditions and has met our brand's requirements in terms of quality and durability.

Like all folding dinghies in the 3D Tender range, the **ROUND AIR** comes with an adjustable aluminum bench, a pair of oars, an inflator and a carry bag.

290/270/250/230

Inflatable, foldable, lightweight, easy to store in its carry bag, the **TWIN HYPALON** is a top of the range tender from 3D Tender.

It is designed with a high pressure Drop Stitch inflatable floor providing great stability on board and an EVA anti-slip foam cover for your comfort.

It is equipped with 4 stainless steel lifting rings for use on davits or other.

The 3D Tender team has selected for this product the best Hypalon fabric on the market, made in Belgium by the brand Orca® - Pennel & Flipo.

Hypalon fabric is resistant to extreme temperatures. For tropical areas it is essential to choose this fabric.

Like all folding tenders in the 3D Tender range, the **TWIN HYPALON** is equipped with an adjustable aluminium bench, a pair of oars, an inflator and a carry bag.

# TWIN FAST CAT

**FOLDABLE TENDER  
INFLATABLE FLOOR**

330/300/280/260/230/200

A new catamaran style dinghy design for this **TWIN FASTCAT**.

Inflatable, foldable, light, easy to store in its carry bag, the **FASTCAT** will bring you exceptional stability and unequalled speed with a low motorization. Unprecedented, this dinghy is entirely self-bailing when stationary! With its deck above the waterline, the water inside the dinghy drains naturally, so your feet will always be dry.

The **FASTCAT** is designed with a Drop Stitch high-pressure inflatable floor for stability on board and a non-slip EVA foam deck covering for comfort. This floor is one piece, non removable, and glued directly to the boat structure.

It is equipped with 4 stainless steel lifting rings for use on davits or other. The 3D Tender team has selected for this product the best PVC fabric on the market, made in Germany by the brand Mehler.

# QUICK ROLL

## FOLDABLE TENDER SLATTED FLOOR

The **QUICK ROLL** range is the result of the Research & Development work carried out by 3D Tender, designed to offer a foldable, practical, and reliable tender for all boaters. Created to be easy to use, quick to assemble, and simple to store, it is aimed at owners looking for a high-performance tender that remains compact once folded.

Models in the **QUICK ROLL** range are equipped with a flat, rigid slatted floor, providing excellent onboard comfort. Combined with an inflatable keel, this floor ensures optimal stability, improved directional control, and safer handling on the water.

The aluminum transom guarantees strength and durability, allowing the installation of either an electric or petrol tiller-steer outboard engine.

# WORLD TRAVEL

## FOLDABLE TENDER INFLATABLE FLOOR

235/200

The **WORLD TRAVEL** is an inflatable dinghy, foldable, easy to store in its carrying bag, with slatted floor designed for boaters looking for a comfortable, resistant dinghy and providing more space on board for storage.

Its conical tubes will bring great stability to the dinghy and increased comfort in navigation.

The **WORLD TRAVEL** is made with a PVC fabric composed of an ultra-resistant polyester weft, an outer coating for protection against the marine environment and an airtight inner coating.

# PILOT 420

## ALUMINUM BOAT ALUMINIUM HULL

The PILOT 420 is a 3D Tender harbor service boat. The boat is the specialist in harbour manoeuvring assistance for boats of all sizes. Its compact design and shallow draft allow it to maneuver in the most difficult to access areas. The boat is extremely robust with its 5mm thick H5083 aluminum hull and dense 3mm internal structure. the 20 cm PU reinforcement all around the hull provides maximum protection in case of contact, without marking the boats.

The structural plans have been validated by the classification society Bureau Veritas. The boat a rounded bow, called «marotte», which allows it to perform its function as a pusher boat. The flat bottom, the good width/length ratio and the design of the hull, give it excellent stability and maneuverability at sea. The PILOT 420 is equipped with two towing mats, one forward and one aft directly linked to the structure of the boat.

In order to secure the boat, handrails are present all around the PILOT 420. This boat is self-draining. On request, the shell of the Pilot 420 can be declined in other colors, and the fenders in white

# THE 3D TENDER SPIRIT

3D Tender is now present in 14 countries in Europe and beyond. A achievement made possible not only by 17 years of experience and expertise, but also by close collaboration with our dealers, who have placed their trust in us.

By putting all our efforts into producing top-quality boat models, we've been able to put together the most diverse product range on the market, while offering competitive prices to guarantee a sailing experience for all.

A company rooted in its Breton origins, it's our passion for the sea that drives us to innovate, thanks to a team of specialists

We are now number 1 in sales of RIBs and tenders in France, a position we owe to the proximity between ourselves and 3D Tender enthusiasts, whether it's to advise you or to come to your help at the slightest swell that might disrupt your navigation.

We are also grateful for the trust that other sea and sailing enthusiasts place in our products, which we will continue to design with passion and innovation.

Thank you for sailing with us!
